Type HCL Series Ultra Slim Package -7.25mm High power to size ratio

High overload capability

UL approved

These wire wound resistors are designed in an ultra thin package capable of dissipating high power where space is at a premium and heat sinking is available. The resistor is capable of absorbing high overloads in relation to its size.

The resistors are ideal for use in servo drives & controllers and frequency inverters. They are used for motor braking, dummy loads and in conventional power resistor applications.

Characteristics – Electrical

	In Free Air	@20°C	@40°C	
Rated Power (W)			-	
	HCL130	70	50	
	HCL165	100	65	
Resistance Range		See chart below		
Tolerance		±5%, ±10% (tighter on request / evaluation)		
Maximum Operating Voltage		1000V; In accordance with UL 508		
(VAC) - (f=50Hz)		specification reduced to 600V		
Maximum Operating Voltage		1414V; In accordance with UL 508		
(VDC)		specification reduced to 848V		
Surge Voltage Capability (V)		4000 V; in accordance with IEC 61800-5-1		
(Between active part and housing)				
Insulation Resistance		≥100MΩ @ 500 VDC		
Dielectric Strength (f=50Hz,		2200 VAC for 1 Minute		
1Min)				
TCR		-80 to 200ppm/°C		
Cable		Standard insulated 18AWG,600V,200°C		
Resistor Body		Anodized Extruded Aluminium Profile		
UL File Number		E164323

Power VS Surface Temperature Rise

** All tests are conducted using a 0.5°C/W rated heat sink. A thermal transfer compound must be applied to ensure low thermal resistance between resistor and heat sink. The heat sink must be flat to ensure good contact with the resistor.

How To Order
