

Product/Process Change Notice - PCN 16_0191 Rev. -

Analog Devices, Inc. Three Technology Way Norwood, Massachusetts 02062-9106

This notice is to inform you of a change that will be made to certain ADI products (see Appendix A) that you may have purchased in the last 2 years. Any inquiries or requests with this PCN (additional data or samples) must be sent to ADI within 30 days of publication date. ADI contact information is listed below.

PCN Title: ADuM5010/ADuM6010 Die Revision

Publication Date: 27-Sep-2016

Effectivity Date: 26-Dec-2016 (the earliest date that a customer could expect to receive changed material)

	D
Ravision	Description:
1 10 1131011	Describilion.

Description Of Change

Die Changes:

- 1. Modify isoPower control logic to use Under Voltage Lockout (UVLO) signal to gate the transformer driver output in the feedback control channel.
- 2. Change in Polyimide material formulation used in the insulation process on coil die.
- 3. Additional layer of Polyimide passivation on top of the non-coil die.

Reason For Change

Die Changes:

- 1. Improve the robustness of the Viso start-up circuitry at low temperature.
- 2. Transition away from a Polyimide insulation material in obsolescence. The new Polyimide material formulation will continue to support the UL, CSA, and VDE safety certifications obtained with the original Polyimide insulation.
- 3. Polyimide overcoats offer the following advantages: improved ESD robustness, enhanced protection against die scratches, package stresses, surface ESD/EOS events and radiation.

Impact of the change (positive or negative) on fit, form, function & reliability

No change to fit, form, or reliability. No change to the data sheet.

Improved robustness.

Product Identification (this section will describe how to identify the changed material)

Cut-Over Date Code provided upon request after PCN approvals.

Summary of Supporting Information

Qualification has been performed per Industry Standard Test Methods. See attached Qualification Results Summary.
